Case Study

Located adjacent to Madejski Stadium home of Coca-Cola Championship side Reading FC is the Millennium Madejski Hotel—not only is the hotel a busy operation Monday to Friday with business guests, when Saturday comes the hotel helps and supports the hospitality activity associated with the Football Club.

As part of the refurbishment of Le Café at the hotel, the design brief was to incorporate a buffet for use during the busy breakfast, lunch and dinner service periods. King's Buffets was chosen as each buffet is custom manufactured to the individual establishments requirements and could therefore incorporate both the hot and cold sections needed within a footprint of 5800mm x 1160mm.

Set flush within the granite display top the King's Buffets unit includes a contact cold 'frost-top' section for presentation of salads, fruits and cold meats / fish, which can be presented in dishes of various shapes and sizes. Adjacent to the cold section is a two zone hot contact section for the presentation of main entrée items and side dishes. As with the cold 'frost-top' section various shapes of sizes of display dishes can be used to enhance overall food presentation. A further hot section is built into one end of the buffet for the display and service of carvery items and feature dishes such as paella.

The 'floating top' design is achieved using a central pedestal base which emphasises the open plan nature of the restaurant, giving a spacious and open feel to the whole area. Set to either side of the unit are self help ambient and heated plate shelves, allowing the diner to pick and choose as desired.

Each King's Buffets unit is as individual as the site—units are custom built to reflect the design criteria of each site and can be custom finished to form part of the overall restaurant design.
