7th Floor Restaurant: 120 cover main restaurant area with Private Dining Room, and outside terrace area seating up to 40 additional guests.

6th Floor Club Venue and Gardens: Private club for full function and night club use along with roof top gardens.

Case Study

With fantastic views across London, Babylon is set on the 7th Floor of the old 'Derry & Toms' Department store in the heart of Kensington. Benefiting from its 7th floor location the restaurant is at 'tree top' height above the famous 6th floor roof gardens.

The project brief given by the restaurant and kitchen team was to improve the kitchen environment giving better work flow and greater communication during the service period.

This was achieved by installing a central island Athanor suite measuring 3200mm x 1400mm comprising 2x radiant hobs, 2x 900mm gas solid top, 2x single 'Plaque Athanor' Plancha, 1x multi-cooker thermal bath, 1x radiant hob, 2x 1/1 Gn gas oven and 1x two drawer holding cabinet.

During the busy summer period the kitchen can produce up to 200 covers per service. "Having now installed the suite the feeling in the kitchen is completely different. We've been able to increase work flow space around the suite and increase our communication as a team" comments the Executive Head Chef
